They are not cheap but very well made.</p> <p>Regards</p> <p>John, Loblolly.</p> |

No problems but I never really tested it and I hope not to test it big time. It does need a different anode. One word of warning, I searched for Rope Stripper on Google, you should have seen what I got back. My PC has still not recovered and still gets "interesting" material related to stipping, not paint!</p> <p>Geoff</p> |
