I can't see any down side to doing it now, besides the work and expense of the paint. would anyone give an opinion on this subject.</p> <p>Cheers</p> <hr/> <p>Stuart & Heather Cairnie Bavaria 42 "Overdraught" Ontario, Canada</p>

I regret not having done Playtime when we took delivery 5 years ago.</p> <p>To remove all the anti-fouling after 5 years and get back to clean gelcoat to apply the epoxy will be a major job - it will need sand blasting or equivalent.</p> <hr/> <p>Roger Playtime (B38 Ocean)</p>

When you put in those terms I'd much rather do the job now, rather than that nasty job five years down the road. In Canada the Interprotect 2000E is about \$100 Can. so about 6-7 kits is much cheaper than getting the bottom blasted.</p> <p>Cheers</p> <p>Stuart</p> <hr/> <p>Stuart & Heather Cairnie Bavaria 42 "Overdraught" Ontario, Canada</p>
